

Topic: Access to university books that the library could already provide

Author: Gabriel Archilla Cintrón

Date: 31/August/2022

Problem Background

- The university has a library that although it has good facilities and content in it, access to this already perhaps becomes a bit primitive for most students. that in these times have become accustomed to digital books.
- Books that the library already owns might not be in the best condition were then too enters the one that can have at least one digital copy to which it can be accessed by a platform of the library.
- All courses use reference books that the library may already have in possession of either by a bad platform or the complicity of access to these the student must resort to buying the same.

Countermeasures

- A Platform with access to a wide variety of books, manuals and among other documents in possession of the library being available to the student in both physical and digital states.
- A selection of the book house itself whether this book can be downloaded freely or not, if it is not that at least it can be read by all students who need it from the library's own platform so that the rights of the same are being respected.
- Access to students being free and to those who are not students is at the choice of the university if access to these would have a cost or not.
- Encourage the idea so that books that do not have a campus in the same way can have another so that it is encouraged that every student can feel that the university has what he needs for his classes.
- In this way also reduce the costs of students in the search for books that are used year after year.

Target

A platform in which not only offered an accurate search of books for the courses but also ' with digital copies of these for those who prefer to access one of these in a more comfortable and simple way could provide the following:

- Promote the use of the tools owned by the library
- A visually pleasing platform for student use
- Reduce expenses on books that would be available to the student
- Respect copyright so that these documents are not downloadable so that the use of the platform is frequent and used by students.

Check/Evaluate

- Library tools are made the most of
- Books are preserved and with convenient access for all university community
- More accessible search for books or references used year after year in courses
- Growth in the promotion of research carried out by the university community.

Causes

Some sites like www.academia.edu offer this limited free service by which students access a limited variety and a large one in case they pay. As students at our own university, we could benefit from a similar platform offered by the library that not only find the book you are looking for but also other related ones and in the same way books and or research carried out by professors, instructors, other students and etc. These can be supported and encouraged by the university community.

Act/Standardize

- The University can provide what the student needs in terms of information for their courses
- Fast, accurate and convenient access to all content.
- Promote research and writings of the university community
- Convenience in the selection of the format of each content.
- That owners of the same are free to determine the download or only access of these and read by only the platform of the library
